## EFFORT AT MEETING INDEBTEDNESS FAILS

Receiver William A. Marshall has given notice of a sale November 15 of the property and rights of the Austin-Manhattan Mines company of Austin to satisfy judgments against the corporation. It is said the plans for reorganization were not successful. Judgments for about \$150,000 were secured against the company by Pittsburgh men a year ago.

Development work includes a 6000-foot tunnel, opening up the mine at a depth of 700 feet. It is an old property, in a district which has produced heavily during a long term of years.

## THIS ADDITION TO TONOPAH WEIGHED JUST EIGHT POUNDS

When the stork flew low over Tonopah last night he dropped down to the home of Bill Davis, of the Montana, and deposited a good chunk of loveliness that Bill exhibits to his friends as the coming champion in the better babies' contest. Dr. Cunningham officiated and Bill is said to be getting over his surprise as well as could be expected.

## WIFE OF MINING MAN DIES AFTER OPERATION

Following an operation at a local hospital, Mrs. Pearl Wilkerson, wife of E. C. Wilkerson, a mining man of Tuscarora, died Sunday. She was a native of Nevada, 31 years old, and was well known in Elko and Tuscarora. Mrs. A. H. Smith of Reno was her aunt. She leaves two children, Mortie and Tonita Hulrey, of Tuscarora. Her body was taken to Elko for treatment.

## MONTANA THIRD IN PRODUCTION OF SILVER ORE

RANKS SEVENTH AMONG THE STATES IN VALUE OF MINERAL PRODUCTS.

Montana ranks seventh among the states in the total value of its mineral products and second in the production of copper, for which Arizona stands first. The production of copper in both states, according to E. W. Parker, of the United States geological survey, increased notably in 1912. In Montana from \$77,847,365 in 1911, to \$104,105,963; in 1912, to \$108,738,873 pounds, valued at \$51,196,914, in 1912; and in Arizona from \$96,141,538 pounds, valued at \$38,267,692, in 1911, to \$46,251,377, in 1912. The total value of Montana's mineral production was \$53,498,194 in 1911 and \$71,626,873 in 1912, an increase of \$18,128,679. The copper output approximates 70 per cent of the total.

A small quantity of copper was produced in Montana as early as 1868. In 1881 the output was less than 1,500,000 pounds, but by 1887 Montana took first place among the states, and for 20 years (with the exception of 1891) continued to hold the supremacy, being displaced by Arizona in 1907. Montana's production of copper to the close of 1912 has amounted to 5,397,924,719 pounds, slightly more than one-third of the total production of the United States since 1848.

In the production of silver Montana ranks third, silver being second in importance among its mineral products. In 1912 the production of silver from Montana ores was 12,731,638 fine ounces, valued at \$7,829,357, an increase from 11,495,196 fine ounces, valued at \$6,352,154, in 1911. Most of the silver produced in Montana is obtained as a by-product in the mining of copper.

The gold production of Montana in 1912 was 176,371 fine ounces, valued at \$3,625,235, nearly 20 per cent being obtained from copper ores.

The value of the metallic contents of the ores mined in Montana in 1912 was \$64,754,613, or 90 per cent of the total mineral production of the state. The only branch of the non-metallic industries which has been developed to any extent is coal mining, the maximum production being made in 1912, with 3,648,495 short tons, valued at \$5,253,155.

Montana leads in the production of precious stones, this supremacy being due to the mining of sapphires, one of the few instances of gem-mining carried on as an industry in the United States. The value of the gems produced in 1912 was \$260,585.

The other commercial mineral products of the state are cement, clay manufactures (principally common brick), grinders, gypsum, iron ore, lead, lime, mineral waters, sand and gravel, sand-lime brick, and stone.

## SUDDEN DEATH OF CHILD IN ABSENCE OF FATHER

A 9-year-old daughter of Ed McLaughlin, of Round Mountain, died suddenly yesterday afternoon, according to advices brought in by D. S. Llewellyn, who sent a message to the father, who is working at Randsburg, Cal. The child was not supposed to be seriously ill the day before, and the sudden termination prevented the father from being summoned in time to see the child before death.

HIGHEST cash paid for furniture. W. O. Dresser.

## MOST PERFECT QUICKSILVER FURNACE

QUICKSILVER FURNACE AT IONE DESCRIBED BY A RECENT VISITOR.

Al Wardle has returned from Ione, where he went for the purpose of looking at the plant in process of completion, designed to be the most advanced quicksilver reduction works in the United States. Mr. Wardle was much impressed by what he saw and he anticipates that in the not far distant future there will be a duplication of this plant at Cinnabar City, near Mina.

"The Nevada Cinnabar company has a fifty-ton furnace, not a retort, in operation at Ione," said Mr. Wardle. "At present it has over one year's ore supply blocked out that will run from one to one and a half per cent of quicksilver. Five condensers, as well as furnaces, are employed to precipitate the fumes by heat and air, and Mr. Scott, the inventor, says the furnace is the best and latest installed. The plant will be running to capacity by the first of the year, as it will take that time to dry out the lining after a drier is put in. Over 440,000 bricks were used in the construction and these were burned on the ground, 160 cords of wood being used for that purpose by Fred Davis, who had charge at the time. I also visited the Mercury plant, which is working on less than one-half of 1 per cent, from which the company is making expenses while doing development work. Manager Pohl told me the demand for mercury is greater than the supply and that the market readily absorbs all that is produced here and in Europe. There is no difficulty in finding buyers, as every flask is sold."

"Now," continued Mr. Wardle, "when I looked at this company's plant and mine and then considered what we have at Cinnabar City, I could not refrain from making a comparison that was all in favor of our location. We have a mountain of lime and an immense ledge of ore that runs better than the average, and their ore is in rhyolite. Our ore is in a mountain of blue and gray lime that should show one of the largest known deposits as soon as we can get around to the proper development of the claims."

## BUTLER THEATER.

At the Butler today a very interesting program will be shown, as follows: "Women," an Essanay drama; "He Fell in Love with His Mother-in-law," a Vitagraph comedy; "Soches in Singapore," a travel picture, and a Self two-reel, "The Wheels of Fate." A rising young author has a frivolous wife whose lover unjustly fastens a murder upon him and skips to Europe with her. A midocean wreck, an eleventh-hour confession and the wireless saves the author from the electric chair. In addition to the above program Mr. James McNamara will be heard in late and up-to-date illustrated and popular songs. Friday, "The Battle of Gettysburg," in five reels.—Adv.

## "BATTLE OF GETTYSBURG."

At the Butler theater Friday afternoon and evening five reels of pictures will be shown; the feature being five-reel war drama, "The Battle of Gettysburg," a faithful production of the most bitter conflict in the war annals of the world, when thousands of soldiers grappled in a death struggle amid bursting shells and terrible cannonading—where men, maddened with the fury of the combat, asked no quarter and none was given—while the whole world stood aghast.
